

2017 PKU Summer School on Silicon Photonic Technology and Applications

<http://spm.pku.edu.cn/>

Sponsorship Opportunities

Since 2011, the Silicon Photonics and Microsystems lab of Peking University led by Prof. James Zhou has successfully organized this annual summer school for 5 years. Every year, about 15 lecturers from prestigious universities, research institutes, and companies (Stanford University, MIT, University of Tokyo, Peking University, Tsinghua University, IOSCAS, IMECAS, Intel, Huawei, ZTE, to name just a few) are invited to present their knowledge, recent results, and insight views on silicon photonics to over 120 attendees from interested organizations such as university, enterprises, and government agencies. We are very proud to see more than 600 graduates have been spread into all sectors of silicon photonics related research, development, and production.

This year's summer school will be held between July 3 - 14, 2017 on Peking University campus as usual. To strengthen the connection between lecturers/students and the real world, we would like to invite your company as a sponsor and exhibitor. We are pretty sure your presence will make this year's summer school another great success. We are looking forward to meeting you in Beijing, China!

Sponsors and Rights:

All Sponsors will have opportunity to distribute branded item to School attendees, and company logo and link on website, plus:

Gold US\$10,000: a) Opportunity for a technical lecture on related product, b) Full page ad in program and three (3) School registrations
